HIGH QUALITY GERMAN STAINLESS INSTRUMENTS CRAFTED FOR EYE CARE PROCEDURES

Bruder Healthcare provides a line of ophthalmic specialty instruments and accessories for medical professionals working to relieve eye discomfort.

We provide a variety of state-of-the-art forceps and paddles carefully crafted for eye care procedures including:

- Expression of the Meibomian glands
- Punctal plug insertion/removal
- Precise eyelash removal
- Bandage lens removal
- MGD eyelid debridement and more

Each instrument is reusable and autoclavable. View our instrument sanitizer and trays to prolong instrument life.

BRUDER Moist Heat Eye Compress

When microwaved and applied for 8-10 minutes the **Bruder Moist Heat Eye Compress** delivers an effective moist heat treatment that is perfect for preparing the meibomian glands prior to an expression.

Item #34160

BRUDER Meibomian Gland Expression Instruments

COLLINS™ Expressor Forceps

For mild or aggressive expression of the Meibomian gland.
3 3/4" (95mm) Length. Oval forceps with closed paddles. 10mm diameter, 1mm thick. Angled at 12 degrees for easy lid access. Single hand, easy-grip handle. German Stainless.

Angled for easy lid access

LIVENGOOD™ Expressor Paddles

For mild or gentle expression of the Meibomian gland. 3" (75mm) Length. Oval 10mm Diameter, 1mm Thick paddles. Knurled handle. German Stainless.

Available angled (12 degrees) or straight

BRUDER Jeweler Forceps

Available in 4 popular sizes. German stainless. 4 3/4" (120 mm) Length.

BRUDER Meibomian Gland Expression Instruments

BRUDER Roller Expressor

Item #98611

For Meibomian Gland Expression. 4 3/8" (110mm) Length. Provides quick and efficient multi-gland expression. Rollers feature a special coating to prevent slippage. German stainless.

Rollers feature special non-slip coating

BRUDER Rectangular Expressor

Item #98612

For Meibomian Gland Expression. 4 3/8" (110 mm) Length. Similar to the Collins Forceps multi-gland expressor (#98610) except designed with rectangular paddles instead of oval. German stainless.

Angled for easy lid access

BRUDER Long Nose Expressor

Item #98613

For Meibomian Gland Expression. 4 1/4" (108 mm) Length. Designed with long narrow paddles for multi-gland expression. Angled for easy lid access. German stainless.

Long nose design for more gland coverage

BRUDER Specialty Instruments

KARPECKI Debrider

Item #99653

For debriding the lid margin. 4 3/4" (120mm) Length. Slightly curved tip with a "crisp" edge on both sides. The edge is just right to easily remove keratin and caps over the meibomian glands by sliding the instrument, curve forward, along the eyelid in a single direction. German stainless.

Crisp, curved edge

BRUDER Epilation Forceps & KARPECKI Epilation Forceps - Delicate

Item #98650

Item #98657

Non-slip jaws grip tightly

For precise eyelash removal. These forceps feature non-slip jaws/tips and an easy-grip, non-slip handle. German stainless.

BRUDER Epilation Forceps. 4 3/4" (120mm) Length with 1.5mm tip.

KARPECKI Epilation Forceps - Delicate. 4" (100 mm) Length with 1.0 mm tip.

KARPECKI Bandage Lens Forceps

Item #98652

For bandage lens removal. 4" (100 mm) Length. Many clinicians have experienced the accidental removal of healing epithelium while removing a bandage contact lens. Problem solved with the KARPECKI Bandage Lens Forceps. The instrument features a narrow, rounded tip to break suction at the edge of the lens. Tips feature a special coating instead of serration to ensure that the bandage lens will not slip when being removed. German stainless.

Special non-slip coating

KARPECKI Punctal Instruments

KARPECKI Punctal Plug Forceps

Tips feature small grooves to grip plugs

For punctal plug insertion and removal. For use with temporary or extended duration punctal plugs. 4 3/8" (110 mm) Length. Grooves on the inside tip hold the plug solidly in place during the procedure. The instrument can be turned 90 degrees to a flat side to push the plug in place if necessary. German stainless.

KARPECKI Punctal Dilator - Double Ended

This unique design may be the only dilator you'll ever need.

For punctum dilation. 4 3/8" (110 mm) Length. The double ended punctal dilator features a standard size dilator on one end and a smaller diameter dilator on the other for patients with small punctae. Knurled handle is designed to increase the ease of handling and manipulation. German stainless.

Each dilator is 1 1/2" (40mm) long. The small dilator side goes from 1mm tapers to 0.12mm. The standard dilator side goes from 1mm tapers to 0.24mm. Both dilators have rounded tips.

Membrane Forceps

Karpecki Prokera Lens Forceps

For gentle handling of Cryopreserved amniotic membrane. The Prokera Lens Forceps are designed to perfectly fit the PMMA ring edge surrounding the amniotic membrane. This forceps offers a safe and easy way to remove the Prokera Lens after use. It is constructed so the tip is rounded to avoid trauma to the ocular surface while solidly gripping the edge of the Prokera ring.

Rounded tips gently grasp and lock to allow easy removal

Karpecki Dry Amniotic Membrane Forceps

For handling dry amniotic membrane. These forceps offer a gentle and safe way to handle dry amniotic membrane, without the possibility of damaging the delicate membrane. It can also be used for the bandage contact lens that is placed over the dry amniotic membrane.

Oblong shape for better handling

BRUDER Instrument Sanitizers and Trays

BRUDER Dry Heat Glass Bead Sanitizer

Perfect for use with Bruder Meibomian Gland Expression Instruments and all metal instruments.

The Bruder Sanitizer is a quick, easy-to-use and effective alternative to traditional methods of cleaning. Once switched 'ON', the unit is ready to use within 30 minutes. Sanitizes within 30 seconds.

The compact electric 3-prong unit maintains temperatures between with 240°C - 260°C.

NOTE: Glass Bead Sanitizers are not FDA approved as sterilizers.

Available for sale in the US and Canada only.
